MAMMOGRAM INFORMED CONSENT

Please read each paragraph carefully and sign and date the form.

- I understand that a mammogram is only 90% accurate in detecting breast cancer and is only a partial examination for diagnosing breast cancers.
- I understand, based on my clinical symptoms, I may be referred for a diagnostic mammogram, ultrasound or to a surgeon. The diagnostic mammogram and ultrasound are not considered preventative and would be billed as separate studies.
- I understand that I am responsible for getting my results if I have not heard from my physician after 2 weeks.
- I understand periodic breast examinations should be done by a physician.
- I understand if after seeing my physician I continue to have breast problems, regardless of a negative report on the mammogram, I will contact my physician for instructions on further follow up.
- I understand some redness and/or tenderness of my breasts may occur following the mammogram due to the compression device necessary for good images, but these symptoms should be gone within 24 – 48 hours.
- I understand a mammogram does require the use of low dose radiation; therefore, I will inform the technologist if I think I might be pregnant.

3D Mammogram Upgrade

3D Mammography is a new screening and diagnostic tool designed for early breast cancer detection.

During the 3D portion of the exam, the X-ray arm sweeps in a slight arc over your breast, taking multiple images. This provides greater detail, allowing the radiologist to examine your breast tissue in one millimeter slices. They can scroll through images of your entire breast like pages of a book.

The additional 3D images make it possible for a radiologist to gain a better understanding of your breast tissue and possibly reduce the need for follow-up imaging.

3D mammography complements standard 2D mammography and is performed the same way as the 2D system. Compression is still required and takes a few more seconds.

The 3D Mammogram may not be covered by insurance but we will submit the claim to your insurance company. If it is not covered, you will be billed the cost of the 3D mammogram at a later date. The cost of this procedure is $60.00.

☐ **Yes**, I would like the 3D Imaging. I acknowledge that the 3D mammogram may not be covered by my insurance company and that the fee associated will be my responsibility.

☐ **No**, I choose not to have the 3D Imaging. I acknowledge I will have 2D Imaging.

Insurance Waiver

Date: _____

Patient Name: _____

Provider Name: _____

I understand the mammogram performed on the above date may not be covered by my insurance company due to:

- ☐ It may not have been a full year since my last screening mammogram and I understand my insurance only covers 1 screening per year.
- ☐ I am under the age of 40 and I understand mammograms are recommended starting at age 40.
- ☐ Provider is not recognized under my insurance plan. I understand that I may be using an out of network provider for these services.
- ☐ None of the circumstances listed above apply to me.

I elect to receive services today and agree to pay any and all of the balance due related to this procedure if not covered by insurance.
